

AUTOVID CP SELF-DISCHARGE SKIP

The Autovid CP self discharging skip is able to handle earth, rubbish, concrete etc and is designed to be used by the crane operator without the need for an assistant.

The skip is operated by placing it on the ground where it is to be discharged and slackening the crane rope until the Pelican safety hook releases from the bale arm. The crane rope is hoisted and the skip will discharge. The reverse procedure is carried out to pick up the skip.

The Autovid CP offers a genuine improvement in site productivity over the traditional Circular Tipping Muck Skip and is available in sizes ranging from 350 litres to 2000 litres.
